This book is the true story about the Military action taken by the US and their Allies against the Japanese Army and Navy who were defending two small islands in a region of the Ryukyu Islands called Sakishima Gunto in late 1944 and 1945. The two islands; Miyako and Ishigaki Jima with their five operational airfields were the Japanese launching points for their Taiwan (Formosa) based Special Forces, known to the Allies as "Kamikazes". Kamikazes made their final no return flight from these two islands to die while crashing their airplanes into the American and Allied ships during the battle at Okinawa. Book Price \$35.00
